

How to use the code

1. Download XAMPP at <https://www.apachefriends.org/download.html>
2. Create a folder on called 'template' under this location: C:\xampp\htdocs\
3. Download code from this repository: <https://github.com/ShanFBLA2020/FBLANCE> into the template folder of your localhost.
4. Change the Login & password
 - a. If your login is root and password is blank, use the same config.php file
 - b. If your login is root and password is different, change the config.php file
 - c. If your using a different login, change the config.php file accordingly
5. Execute 'contact_db_sql' which will create the SQL Database{contact} and tables{awardcriteria, contactme, servicehours, student, users}.
6. Open 'index.html' under the template folder in internet explorer in order too run the application. Example as <http://localhost/template/index.html>
7. Using the signup option to create an account for using the application.

See the slides(Shanmuka Sadhu FBLA project.pdf) in the repository for more details about the project.
